ASSIGNMENT 4

The Perfect 404

Different Users: - There are three main users of Georgian College's website:-

1)Primary User: - The primary user for Georgaincollege.ca are students both present and future. They are the main users and they use this site for different purpose like some user uses Georgian college website for logging to their

blackboard account while some other students use to open banner as well as employ Georgian. Even some students use the website for accessing the library as well to check the plagiarism through turn it in.

2)Secondary User: - The second type of user are secondary users. The secondary user consists of Teachers and employees. Teachers use the site to update the content as well as logging into their blackboard account. The employee's uses this to open employee portal where they can discuss ideas as well as another jobseeker's profile.

3)Tertiary Users: - The third type of users are the tertiary users and this group consist of parents. Who visit the Georgian site to explore different program's and course because they want their children to select the right option.

2) The 404 page consist of the error message along with error code and reason behind the error or why this error page arrives. Even it contains a button with try now which allows the user to go back to the home page of the Georgian college. Moreover, there is image which indicates about the error404.

3) My idea was to create a user-friendly error page in which user should be able to know what is wrong with the page like the reason behind the error. So I decided to go with an image of 404 which tells the user that page is not found and on the right side the reason along with error code in text.
